--------------	----------

fetch\_facebookorganic *fetch\_facebookorganic* A function to fetch Amazon Ads data from the windsor.ai API

---

## Description

fetch\_facebookorganic A function to fetch Amazon Ads data from the windsor.ai API

## Usage

```
fetch_facebookorganic(  
  api_key,  
  date_from = NULL,  
  date_to = NULL,  
  fields = c("campaign", "clicks", "spend", "impressions", "date")  
)
```

## Arguments

api_key	Your api key to access Windsor.ai API
date_from	The date from which to start getting data in format YYYY-MM-DD
date_to	The date until which to start getting data in format YYYY-MM-DD
fields	he fields fetched from the API for a given connector See <a href="https://windsor.ai/api-fields/">https://windsor.ai/api-fields/</a> for details.

## Value

A data frame with the desired data

## Examples

```
## Not run:  
my_facebookorganic_data <- fetch_facebookorganic(api_key = "your api key",  
  date_from = "2022-10-01",  
  date_to = "2022-10-02",  
  fields = c("campaign", "clicks",  
    "spend", "impressions", "date"))  
  
## End(Not run)
```

---

my\_facebookorganic\_data

*Sample of digital marketing data from Facebook Organic downloaded by means of the Windsor.ai API.*

---

### **Description**

A dataset containing sample Adform data fetched from windsor.ai API. See more at: <https://windsor.ai/>

### **Usage**

my\_facebookorganic\_data

### **Format**

A data frame with 164 rows and 5 variables:

**campaign** name of the campaign

**clicks** number of clicks

**spend** spend data

**impressions** impressions data

**date** date

### **Source**
