NAME

bookshelf−listallfonts − list all fonts known to LuaTeX with "interesting" features

SYNOPSIS

bookshelf-listallfonts [−d] [−f FEATURES_FILE] [−x EXCLUDED_PATTERNS_FILE]

bookshelf-listallfonts −h

bookshelf-listallfonts −v

bookshelf-listallfonts −m

DESCRIPTION

List all fonts known to LuaTeX adding "interesting" features to the listing.

The script queries luaotfload databases and outputs the list of fonts and features as a tab-separated stream with two field: font name+feature name, and LuaTeX loading command. This form is suitable for **mkfontsel.pl** (1) command from the *bookshelf* package.

We always include default features, `+clig;+liga;+tlig`.

It is recommended to issue

```
luaotfload-tool --update --force
```

before running the script.

OPTIONS

−d Print debug information on the standard output.

−f *FEATURES_FILE*
Use patterns in the *FEATURES* file instead of the default ones.

−x *EXCLUDED_PATTERNS_FILE*
Exclude patterns (font paths and features or combinations) listed in *EXCLUDED_PATTERNS_FILE*.

−v Print version information

−h Print usage information

−m Print manual page
